

2023

Standard Bottles and Closures

It was in 1991 that the SHB Company was founded as a development company for specialist products in the mining industry. Two years later came the start of the first standard cosmetics series: HSSH! A range of bottles and caps are still available, now being part of our: "Classics" range.

Already in 1994 SHB took over the household, cleaning and laundry ranges from the KWR Company in Rheine together with the associated tools. In the following years, one standard cosmetics bottle series after another was developed and distributed across the whole of Europe and we also started working on the US and Canadian market. A small leaflet giving an overview of the products in our early years quickly turned into an impressive catalogue which is being renewed every year again. At the end of 2005 the Headquarters of the company moved into its own premises where we still are at home. The pre-launched modular system combining all our bottles with many different closures was further extended.

Our customer can select his packaging from a range of over 100 bottle series and more than 60 different closures - and because of the modular system, hundreds of combinations have now become possible.

Our customers abroad work closely with our agents in Europe, the USA and Canada. Through this global network we remain constantly in contact with our customers worldwide, and as a result of this close collaboration, many new ideas emerge which give birth to many new standard items. But it also leads to completely individual packaging solutions which are driven forward by our technical team, right through to being patentable in places. Our sister company USIMEX specialises in developing customer-owned projects and bespoke packaging, which often diverge from the usual standard. Our competent and enthusiastic team of experts respond to our customers particular wishes and offer them creative solutions for their new products.

Our team consists of 40 staff in our Crailsheim Headquarters, and is now led in the second generation by son and daughter. The company therewith remained privately owned. In 2021 we were celebrating our 30th anniversary and we look with confidence into the future. In a diversified market of medium-sized enterprises in Europe, specialised niche solutions are the key to success. Every medium-sized business that wishes to succeed looks for solutions which provide that key!

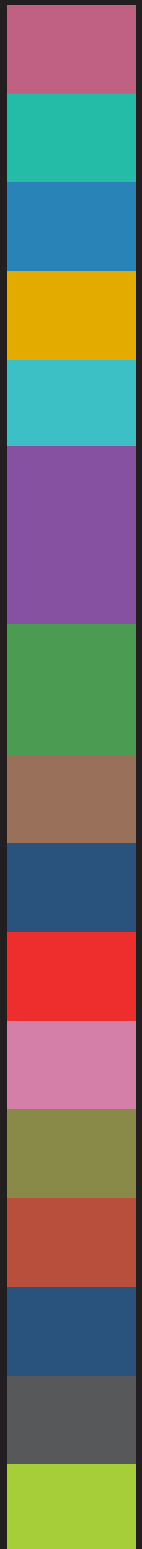

A highly important aspect that we take very seriously is closeness to the customer, our customers goals must be our goals too! This has been our motto for more than 30 years, and only by following this principle we can continue to succeed in the highly competitive marketplace.

In 2023 we will also be present at many different exhibitions and shows all over Europe. Our actual show calendar can be found on our website. We look forward to welcome you at one of these or any other events, to show and share our philosophy.

We like to thank all of our customers, supply partners and business associates for their trust and loyalty and look forward to our continuing partnership!

BETA

DELTA

Adapter INSERT
(including screwcap)

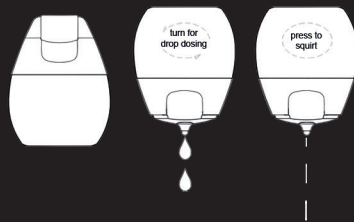

Adapter 24/410

The patented DELTA Adapters are one of SHB's new developments. These adapters are compatible with all SHB DELTA bottles. It is easily fitted and converts the snap-on bottle neck to a standard screw thread. This means that for example a soap can be added to an existing bottle range without any additional costs.

ALPHA-D

Inspired by nature, SHB has designed a completely new dosing system! This new system allows you to dose drop by drop therefore alleviating the need for an expensive valve.

Open the cap and turn the bottle over and you can dispense drop by drop, no pressure on the bottle required. Squeezing the bottle allows you to squirt the product as well if required.

This system is ideal for applications such as adding concentrates to flavour your drinks, dispensing hair colourant or a cleaning concentrate. In fact anything that requires a measured dosage!

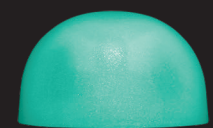

Due to the different viscosity of your product, we can offer 3 standard orifices with 0,3, 0,6 and 0,8 mm diameter. Please test under your own conditions to ensure, that the Dropper is suitable to your requirements.

Any bottle with the GEMINI III neck can now fit a MARS cap!
We just need to make a small amendment to the bottle neck.

You can find visuals of any bottle which can fit the MARS cap in
our SHB APP or visit www.shb-gmbh.com.

SHA01 PATENTED ANGLED NECK ADAPTER FOR TOILET-CLEANER BOTTLES

The concept of a WC adapter has been developed and patented over many years. The new adapter, named the SHA Adapter, is available as of now for angle-necked bottles in HDPE and PET. Use of this adapter greatly simplifies the manufacture and filling of angle-necked bottles.

- Simplified bottle production on conventional blow moulding machines
- Standard upright filling of the bottles on conventional filling machines
- The combination of the adapter and the KISI closure can be snapped on in an upright position just like a regular closure

We currently offer this concept for our standard bottles in HDPE and PET in 500ml, 750ml and 1000ml sizes. If you are looking for your own design for a bottle like this, we are your competent partner in its development.

USIMEX

CUSTOMIZED PACKAGING

- Direct access to our expert team to translate your wishes into reality
- A unique bottle shape to express the identity of your brand
- Distinctive shelf impact that expresses your own ideas and aspirations
- Exclusivity for your new design
- Cost optimization through use of existing closures
- Amazing speed to market
- One-stop shop: all your requirements met under one roof

PRODUCT DESIGN

We'll gladly translate your own ideas into a 2-D presentation, or even create an illustration in photographic quality. We'll even include your own label if you wish.

MODELLING

We'll create a hand-made 3-D wooden model of your future product, which will be barely distinguishable from the real bottle. You'll be able to try out the feel and functionality of your products before completion. You'll be surprised!

TOOLMAKING

We'll choose the best toolmaker for your project according to your specific requirements and the urgency of the project.
We'll determine the number of cavities according to your anticipated quantities, so that you don't have to pay unnecessarily high tooling costs, and production can be more flexible.

PRODUCTION

SHB's production takes place in various locations in Germany, so an ideal location can always be found - based on the quantities required and anticipated transport costs.

WE DESIGN *your product*

**WE THINK
GREEN!**
